

Date:  
May 2017

Description:  
Under Vehicle Protection Kit

Application:  
Toyota Tacoma 2005-2015 & 2016+  
Generations II & III

Part No. :  
5423010

Price:  
\$807.00

Availability Date:  
June 2017

---

## Product Specification

**ARB Under Vehicle Protection panels are designed to give protection to vital underbody components including steering, engine oil pan, transmission and transfer case.**

Laser cut, press formed and folded 3mm sheet steel is used in ARB UVP to provide superior strength and protect vulnerable under vehicle components. The ARB UVP for the Toyota Tacoma 2005-2015 generation and 2016+ generation consist of four carefully designed panels. The front, engine, transmission, and transfer case panels bolt directly to the chassis and cross members to provide continuous under vehicle protection from front bar to the transfer case.

Each UVP panel includes a return edge to add strength to the 3mm panel. The panels are zinc plated and powder coated in a silver textured finish. Recessed mounting bolts are protected and easy to remove for servicing.

## PROTECTION & FEATURES:

Comprises 4 panels:

- Front Panel - Protects power steering, engine sump, sway bar
  - Diff Panel - Protects front diff mounts, engine sump
  - Transmission - Protects transmission and transmission controls
  - Transfer Case - Protects transfer case
- 3mm pressed and folded sheet steel adds more strength than standard folded sheet.
  - Laser cut sheet steel.
  - Zinc plated and powder coated in a silver textured finish.
  - Recessed mounting bolts are protected and easy to remove for vehicle servicing.
  - Vehicle specific design for the Toyota Tacoma.

### NOTE:

While these panels have been engineered for strength and functionality, care and good judgement should be taken when traversing difficult off-road conditions to minimize damage to panels and vehicle. During servicing when panels are removed ensure fasteners are re-fitted to the correct torque values.

Inspect panels and mounting points visually on a regular basis. Dirt and foreign matter should be washed out to minimize build up around hot components. CAUTION is required when removing foreign matter with hands while vehicle is hot or running. Replace any components as necessary.

## PART NUMBERS & PRICING
