## Product Specification

**Whether you're looking to mount a rooftop tent, jerry cans, or a canoe, the new ARB Flat Rack provides the strength of an ARB Roof Rack, with the practicality and clearance of a flat roof rack platform.**

Popular sizes within the current ARB Roof Racks range have been replicated in Flat Racks, available in either steel or alloy variants.

The six different steel racks are available as non-mesh only. The three alloy racks feature an Amplimesh® mesh floor. Existing roof rack mount kits are retained so will suit cage, trade, touring and flat racks in both steel or alloy.
