PRODUCT SPECIFICATION

DESIGN & DEVELOPMENT:

With the introduction of the new ARB Intensity LED driving lights and their use of Deutsch waterproof connectors, ARB has developed a new loom based on the 3500440 Auxiliary Lighting Loom.

The new loom features the same mouse style switch and harness, with Deutsch DT-06 connectors in place of the bullet type connectors used for ARB fog lights and IPF lights.

FEATURES:

- Fuse protected 'mouse style' LED push button surface mount switch
- 105° C rated automotive grade wiring
- Waterproof Deutsch DT-06 connectors
- Heavy duty relay with rubber moisture cover
- Pre assembled 'plug & play' design including mounting hardware and illustrated instructions
- Rated for 1 x pair of lights up to 130W each
