July 2011

**DESCRIPTION:**

ARB Strap Wrap

**APPLICATION:**

Recovery strap storage

**PART NO. :**

10100380

**AVAILABILITY DATE:**

Late August 2011

# PRODUCT SPECIFICATION

Manufactured from 50mm wide polyester webbing, the ARB Strap Wrap solves the problem of recovery straps becoming unravelled either whilst being carried or when in storage.

Each strap wrap is approx. 85cm long and is fully adjustable to sit tight on all ARB recovery straps, from the small 3 metre tree trunk protectors right up to the large 20 metre winch extension straps. Adjustment is simple using a sure-grip buckle similar to those on the ARB recovery bags.

The ARB Recovery logo is woven into the webbing in orange so there is no mistaking its intended purpose, however it has a multitude of uses such as wrapping sleeping bags, camp blankets, tarpaulins, etc.

ARB Strap Wraps are packaged individually in blister packs ready to hang on showroom displays.
