

4X4 ACCESSORIES

**DATE:**

April 2015

**DESCRIPTION:**

Summit Rails & Step

**APPLICATION:**

Ford Ranger T6 PX Ranger and Mazda BT50 Dual Cab & Super Cab 2011 on

**PART NO. & BARCODE:**

Refer Table page 3

**PRODUCT GROUP:**

020 – Side Rails/Steps

**FITTING:**

Protection Step – 1.75 hours

Side Rail & Step – 2.25 hours

**AVAILABILITY DATE:**

April 2015

# PRODUCT SPECIFICATION

## DESIGN & DEVELOPMENT:

With the introduction of the Summit Bar, ARB's engineers required a new clamping system to attach the front rail section to the 60.3mm outer frame of the bar.

Rather than simply introducing a larger side rail clamp to suit the larger tube size, ARB Engineers have developed a neat and practical solution. The design registered clamp provides a number of advantages over a standard side rail clamp.

Two Spacers are included to allow for different tube lengths due to variances in bar to chassis tolerances. The ARB branded cover also allows for adjustment in the side rail to upright positioning.

The step section is an anodised silver extrusion featuring front to rear ridges for grip. Please note that the extrusion is supplied with the front section (either rail or return) selected.

## PROTECTION & STYLING CHARACTERISTICS:

- Vehicle specific design for the PX T6 Ford Ranger and Mazda BT50 Dual & Super Cab (step only)
- Registered design of styling and design components.
- Durable steel construction for maximum protection.
- Manufactured from mandrel bent 60.3mm x 2.6mm ERW tubing.
- Finished in durable black powder coat with the option to colour code to vehicle colour.
- Template provided for drilling of the central mount bolt.
- Anodised extrusion supplied with the front selection. Please note that the front rail 4440150 does not suit current ARB bars for the Mazda BT50.
- Supplied with corrosion resistant fasteners.
- The step section 4440140 weighs approximately 38kg, front rail 4440150 weighs approximately 19kg, return 4440160 weighs approximately 6kg.

## ANODISED STEP EXTRUSION:

Replacing the familiar aluminium checker plate traditionally found on ARB side steps is a new silver anodised extruded aluminium section with front to rear ridges for grip.

## SIDE RAIL CLAMP:

Prominently featuring the ARB logo and manufactured from 30% reinforced Nylon plastic, the new side rail clamp slides over the side rail, allowing for fitment of aluminium spacers to adjust for varying vehicle chassis to bar fitment tolerances.

Part Number	Description	Barcode
4440140	S/STEP RANG/BT50 11ON 60.3MM	9332018035790
4440150*	F/RAIL RANG 11ON 60.3MM	9332018035806
4440160	RETURN RANG/BT50 11ON 60.3MM	9332018035813

\*4440150 F/RAIL RANG 11ON 60.3MM only suits ARB BAR P/No 3440500.
