	Front Coil Spring Trim Spacer					OME95PF5 ²
	Rear Coil Spring Trim Spacer 10mm					OME80PR10
	Rear Coil Spring Trim Spacer 5mm					OME80PR05

¹ OME front coils can only be installed with OME struts. They will not fit on the OE struts due to different winding of the lower coil end.

² To maintain ride height when front accessory weight exceed 220 lbs, OME95PF5 coil spacer should be installed, each OME95PF5 will increase ride height by 10mm.

³ OME661 lower shock stone guards are recommended fitment for protection against stone damage. Sold in pairs.

⁴ Where .75" lift rear coils are selected they must be matched to 2" lift front springs.

⁵ **KDSS** (Kinetic Dynamic Stability System) Compatible. Contact our Tech Department at **(425) 264-1391** for special fitting instructions.

Fitment Notes: The OME springs range has been developed to give owners the ability to reduce the very pronounced 3" of rear to front rake of the original Toyota suspension. By carefully matching the OME front and rear springs the rake can be reduced to be between .75" and 2".
