

## NEW PRODUCT ADVICE

**Description:** IPF 900XS driving lights

**Application:** Most vehicles with provision for driving light mounting

**Part No:** IPF 900XS (available in spot or driving beam)

**“The IPFs were the stand-out pair of lights, with a “hot” pencil beam and a wide, well defined spread.”**

– 4X4 Australia magazine.

IPF lights have once again proven their premium quality credentials, securing 1st place in a comprehensive driving light analysis performed by the renowned 4X4 Australia magazine.

The test took several factors into account, including the lights' housing, mounting systems and installation kits, but by far and away the most important consideration was the effectiveness of light output. An auxiliary light system should serve 2 purposes: a spot or pencil beam pierces well out in front of the vehicle, a driving light beam highlights terrain to the sides of the vehicle, and as the team of experts declared – “Our test showed that the 65-watt-powered IPFs gave superior all round performance to the 100-watt models”. The IPF 900XS model beat home a field that included:

- Hella 160
- Hella Rallye 1000
- KC 69
- Narva Ultima 175
- Lightforce 170
- Both Cibie and Bosch declined the offer to participate

4X4 Australia concluded the article by saying “For bush-touring 4x4 applications the best performer was the IPF 900XS pencil and spread beam combination. The IPFs had the “hottest” long distance centre spot and the brightest, best controlled spread beam”.

# NEW PRODUCT ADVICE

## Features:

- Available in spot or driving beam
- Tough, heavy gauge steel body
- Submersible to 300mm (11.8") for up to two minutes
- Advanced heatproof resin reflector, incorporating water and dust resistant breather
- Reflector surface and design optimized to bulb design for ultimate performance
- Hardened glass lens
- Advanced IPF 65W H9 halogen bulb with water and dust seal for maximum life and performance
- Reinforced multi directional mounting base
- Waterproof connectors on bulb lead and loom connection

## Dimensions:

- 200mm (7.9") dia. x 115mm (4.5") deep

## Complete Kit Includes:

- 2 lights – spot beam, driving beam or combination of both
- Complete snap together wiring loom & relay
- Mouse style LED switch

## Optional:

- Light stays
