FOR IMMEDIATE RELEASE

SAME LEGENDARY IPF 968 LIGHT, NEW BLACK COVER:

ARB 4x4 Accessories, Australian based 4x4 Accessories manufacturer is happy to announce another option to the already popular, IPF 968 light series. Currently offered with a black grills (968CSG), IPF has developed a new complete kit featuring black light covers instead of the grills (968CSB).

As the exclusive distributor of IPF Performance Lighting Systems, ARB requested that this complete light kit specifically designed to suit the needs of ARB fans. Featuring a hybrid reflector lens, black body and new for this kit, a black cover with silver insignia.

This multi-application driving light features a “double reflector” that functions as two separate reflectors. A sub-reflector within the lamp provides a broad fog beam in front of the vehicle while the main reflector projects a driving beam that illuminates the road far ahead. The combination of beams creates the most universal light pattern for any driving situation. The 55 watt H3 bulb (optional 100w included) shines brilliantly through the clear, hardened glass lens.

The IPF 968CSB kit includes a pair of lamps, complete snap together wiring loom with relay, a mouse style switch and black covers.

These lights are competitively priced and are exceptional value for such a high quality auxiliary light. The 6” diameter lens, encased in a black body with black cover will look great on the front of any vehicle.

If you already own a set of IPF 968 lights, the black covers are also available separately (P/N: COV968B).
