

4X4 ACCESSORIES

DATE:

August 2014

DESCRIPTION:

ARB Full Extension Fridge Slide

APPLICATION:

37 & 50 QT Fridge Freezers

PART NO. :

10900029

PRICING:

Retail : \$396.00

AVAILABILITY DATE:

In Stock

PRODUCT SPECIFICATION

DESIGN & DEVELOPMENT:

Recently, the product development team created a new product to add to the range of our popular heavy-duty fridge slides. This new slide enables the sliding tray to extend more than the length of the fridge. This benefits customers as the fridge comes out further from the vehicle so you do not have to reach as far (particularly with drop down tailgates). This full extension fridge slide accommodates the ARB 37 and 50 quart fridges (PN 10800352/10800472).

To create the additional length of travel, the slide base is longer than the standard slide and in many installations the area behind a fridge is left void. In our efforts to maximize this storage space behind the fridge, we have designed an additional tray for storage of items such as a toolbox, recovery kit, first aid kit, water jerry can or a sealed N70 battery. The special laser cut steel rear tray accommodates either a 25mm cam buckle tie down straps or a battery tie down kit.

Utilizing the same design principles as the current ARB fridge slide, it is manufactured from heavy-duty steel, precision laser cut and formed for strength and rigidity. The EZ latch mechanism is easy to operate and includes a "comfort" plastic coated handle. The latch is factory fitted to the right hand side, however its universal design allows it to be repositioned to the left hand side too. To prevent slide roll when parked on uneven ground, the slide may be latched in either the fully open or fully closed position.

FEATURES:

To maximize the storage behind the fridge, keep the slide on the vehicle floor or on top of a low height drawer. The vehicle application list is relatively large; however some vehicles do not have sufficient depth in the rear storage area to accommodate this slide.

The strategically positioned drain hole matches the ARB fridge, enabling you to extend the slide away from the inside of your vehicle and drain the fridge. The bearing guides are adjustable and feature adjustable (4-way) anti-vibration pads to prevent rattles.

The existing 35L / 47L slide (PN 10900021) is still available for sale and is a perfect partner atop a full size rear storage drawer.

The design of the fridge slide incorporates laser cut holes for:

- Affixing the slide to the vehicle (M8 bolts not supplied)
- Affixing the ARB fridge to the slide (M6 bolts from fridge feet)
- Attaching the M8 bolts from ARB fridge tie down brackets (PN 10900010 sold separately)
- Drainage hole which coincides with the Fridge drain port for cleaning the fridge
- L-bolts within battery hold down kits

TECH SPECS:

- Rated to carry 120kg/264lbs load
80kg + 40kg; 176lbs. + 88lbs
- Zinc coated metal substrate for superior corrosion protection
- Black E-coated exterior
- Premium sealed bearings for smooth sliding motion
- External dimensions L x W x H;
925mm x 460mm x 90mm
- Sliding tray dimensions L x W x H;
Fridge tray 665mm x 380mm
Accessory tray 205mm x 380mm
- Tray height = 47mm from base
- Slide extension 700mm
- Net weight 16kg/35lbs
