**FOR IMMEDIATE RELEASE**

## **New Land Cruiser 200 Series Deluxe Winch Bar** ***Full Frontal Protection for Your LC200 Series***

Seattle, June 25/ ARB 4x4 Accessories/ -- Australian based four-wheel parts manufacture is excited to announce the newest addition to the Toyota Land Cruiser 200 Series product line by releasing the ARB Deluxe Winch Bar.

ARB engineers have undertaken extensive testing and analysis to develop a range of bars that offer unequalled protection in the event of a collision and during recovery operations. The 200 Series presented some unique problems that required significant engineering to overcome. The complex SRS airbag compatible mounting brackets have been designed to ensure the vehicle chassis will not fail under the operating conditions that we predict these vehicles will be used in. The chassis has been strengthened considerably to ensure these bars provide maximum durability and protection to the vehicle and its occupants.

The traditional five fold wing has been adapted to complement the shape and distinctive appearance of the 200 Series without compromising strength or functionality, while the leading fold of the pan and wings features a large 30mm radius, for a modern and stylish look.

All important in off road situations the ground clearance and approach angles are greatly improved over standard. As with the installation of the ARB Sahara bar, installation requires extensive modifications to the bumper and internal plastic ducting under the vehicles grill.

Need more lighting? Optional fog lights can be installed into this bumper for even greater lighting performance. Don't plan to install a winch? A color matched included plate can be optioned to cover the winch opening.
