## **FOR IMMEDIATE RELEASE**

# **New 200 Series ARB Rear Tire Carrier Bumper** ***Protect your investment with this stylish, yet effective rear bar***

**Seattle, July 16/ ARB 4x4 Accessories/** -- To complement the growing number of ARB accessories for the latest Toyota Land Cruiser, ARB is proud to announce the rear tire carrier protection bumper for the Land Cruiser 200 Series. Protect your investment with this stylish yet functional rear tire carrier.

Right from the start the 200 Series rear bar was going to be a large development project. With a built in tow bar in the rear cross member and a massive plastic bumper assembly, integrating the ARB rear bar would not be easy.

Key issues for the ARB design engineers were to be the factory fog light (over seas markets only) or reflector being in the way of the arm pivot mechanism and the integration of the factory hitch into the center cover plate. The fog light and reflector were taken care of by designing a new universal moulding that would take their place and cover the pivot bolt also. For markets where fog lights are required, a new fog light kit will be available to replace the original. The kit is still being designed but will incorporate a fog light similar to the stop/tail light mounted in the bar assembly. Markets not requiring the fog light will be supplied with a reflector that sits within the same moulding.

The hitch issue was overcome by supplying a new hitch receiver and two cover panels, one for use with the hitch and one for without. The integration of the receiver within the rear cross member meant that the rear bar would have greater departure angles in comparison to previous Land Cruiser designs where the hitch was built into the bottom of the rear bar. For markets such as the middle east where pintle type towing hooks are used, a separate cover panel has been developed.

*-continued on next page-*

**Features:**

- Utilizes same carriers and cover panels as the previous 100 series Land Cruiser model
- Large radius curves in keeping with modern shape of the vehicle
- Designed to suit both receiver/ball and pintle type hitches
- Increased departure angles compared to O.E. bumper bar
- 3mm steel pan and wing construction
- 4mm, 6mm, and 8mm steel mounting system construction
- Mounting kit for fitment of ARB or aftermarket mudflaps
- Protected flat pin trailer wiring harness included in kit
- Cover panels for various towing arrangements
- Standard in black powder coat finish
- Adjustment and/or removal of the swing arms is possible after the unit is installed
