FOR IMMEDIATE RELEASE

2010+ Toyota 4Runner/Prado 150 ARB Air Locker ***Toyota 8" RR, 12 bolt, Shim Adjusted***

Seattle, June 3/ ARB 4x4 Accessories/ -- Just released by ARB, a new rear ARB Air locker to suit the new generation Toyota 4Runner (2010+) and Toyota Prado 150 (2009+). With the vehicle updates, Toyota also decided improve the already proven Toyota 8" axle that has been in service since the 70's. Luckily ARB Air Locker engineering had access to the new axle early on and was able to develop a product in short time.

This new Air Locker application (RD193) is sure to prove popular among 4Runner/Prado four-wheel drive owners looking to equip their vehicle for their next adventure, with the ultimate on-demand traction device. In addition to providing outright improvements to a vehicle's off road capabilities, an Air Locker will allow a vehicle to be driven in a more controlled manner, thus reducing the likelihood of environmental and vehicular damage.

The attraction of an ARB Air Locker lies in the fact that this full carrier replacement differential gives the best of both worlds... a normal open differential for on road use, and a 100% locked-up differential for challenging off road situations. ARB Air Lockers utilize a 12-volt compressor that delivers high-pressure air to the differential center, thereby engaging the locking mechanism. With both wheels tied directly to the rotation of the ring gear, the vehicle maintains maximum traction when the Air Locker is activated.

Sold throughout the world, ARB Air Locker's patented design has proven ultra reliable, even under the most extreme conditions with structural components manufactured from aerospace grade alloy steels.

Already strengthening the range of Toyota 4Runner/Prado accessories (including ARB bumpers, roof racks and suspension systems), the RD193 is set to prove itself among new generation Toyota 4Runner/Prado owners.

| Application | Description | Part No. | Retail |
|------------------------|--|-----------------|---------------|
| 2010+ Toyota 4Runner | Toyota 8" Rear, 30 Spline, 12 Bolt RG, Shim Adjusted | RD193 | \$984.94 |
| 2009+ Toyota Prado 150 | Toyota 8" Rear, 30 Spline, 12 Bolt RG, Shim Adjusted | RD193 | \$984.94 |
| 2010+ Lexus GX | Toyota 8" Rear, 30 Spline, 12 Bolt RG, Shim Adjusted | RD193 | \$984.94 |

ARB Air Locker Features:

- Puts the power to the ground at both wheels all at the push of a button
- Provides 100% traction on demand without affecting on road drivability or driveline wear
- Vastly improved traction means less reliance on momentum, which reduces the likelihood of vehicle damage or environmental impact
- Easy, convenient operation allows the user to concentrate on the terrain without leaving the comfort and safety of the driver's seat.
- Ultra durable and extremely strong - only the highest quality materials used in construction
- Incredibly simple yet effective design that employs minimal moving parts, thereby ensuring maximum reliability
- Thoroughly tested and proven design - trusted and used in over 100 countries around the world

About ARB

ARB Corporation Limited is Australia's largest and industry leading manufacturer and distributor of quality, 4WD vehicle accessories, with distribution in more than 100 countries worldwide.

The company manufactures and stocks the world's most respected, sought after brands including ARB Air Locker locking differentials and bumpers; Old Man Emu (OME) customized suspension systems, IPF high performance lighting, and Safari snorkel systems. ARB's Seattle office is the North, South & Central American headquarters and importer of ARB 4x4 Accessories.
