FOR IMMEDIATE RELEASE

IPF Fatboy II *Introducing the upgraded Fatboy Bulb Series*

Seattle, September 17/ ARB 4x4 Accessories/ ARB is now carrying the most technologically advanced H4 bulb on the market that combines proven reliability with outstanding performance.

This bulb is an improvement to IPF's existing Fatboy bulb by incorporating the latest in lighting technology that results in a brighter, but more efficient low and high beam.

The Fatboy II Bulb uses an exotic high-pressure gas mix, coupled with a massive bulb envelope to create to unrivalled brilliance. The unconventional bulb shape provides less loss of light from the filament. A stabilizer rod within the bulb extends the life of the filament even in the harshest of conditions.

There are two different color options available, Super Clear and Max White and both are available in pairs or as a single unit.

The Super Clear bulbs perform at an optically equivalent level of a 195/150 watt bulb even though it has a low beam draw of only 80 watts and high beam draw of 60 watts. The Max White bulbs trade a slightly diminished output level for a higher temperature color that mimics that of many H.I.D. bulbs by utilizing a blue tinted glass envelope. These bulbs share a similar draw and have an optically equivalent output of 185 watt low beam and 140 watt high beam.

DESCRIPTION	PART NO.	RETAIL
H4 Fatboy II Super Clear (Pair)	4X41	\$82.97
H4 Fatboy II Super Clear (Singles)	4X41S	\$40.40
