ARB Winch Bumpers Go Domestic For Chevrolet Silverado 1500, 2500, 3500 & HD Models

Seattle, WA – ARB 4x4 Accessories, Australian based four-wheel parts manufacturer has just introduced a new Deluxe Bull Bar style winch bumper for Chevrolet. Chevy owners can now venture off road in total confidence knowing that their vehicle and their investment, is protected with the finest front-end armor system. Available for 1500, 2500 & 3500HD model Chevrolet trucks for years 1999 to 2005.

All ARB accessories are engineered for form, function and strength and this new Chevy bumper is no exception. Originally designed by ARB's founder Tony Brown in 1975 to provide a factory vehicle with enough protection to withstand a high-speed animal impact, an ARB Deluxe Bull Bar style bumper offers your Chevy unmatched protection. The strength of this bumper comes from premium quality steel that has been optimally folded to withstand impact. ARB's five fold, upswept wing design is also engineered for improved approach angle but its unparalleled advantage is in the mounting system. Designed for air bag compatibility, the ARB mounting system allows this aftermarket bumper to work precisely with Chevrolet's safety mechanisms and crush ratings. The style of the bar may have changed over the years but the function has always remained the same – a key to ARB's 30 years of success and product reliability.

This winch compatible bumper is the perfect housing for a Warn winch and will fit a variety of Warn models up to the 16,000 pound unit. Recessed indicators, Hi-Lift jacking

NEWS RELEASE

points, driving light provisions and twin CB antenna mounts are among the features of this versatile bar.

ARB also used the common body style of the Chevy models to everyone's advantage by creating one bumper for the 15/25/3500HD models for years 1999 to 2002 and a second one for those models for years 2003 to 2005. ARB is known for their application specific products and has upheld their standards by creating individual fitting kits for each year and style to combine with the two choices of bumpers for an ideal fit, with the quality and reliability that ARB is famed for. The benefit of using a common bumper with customized fitting kits has resulted in extremely reasonable pricing which has been passed on the consumer.

Currently in stock, these new ARB winch compatible Chevrolet bumpers may be ordered through your nearest ARB dealer.
