ARB Rock Sliders Now Available

For the new Jeep JK 2 Door and 4 Door Wrangler

Seattle, WA – ARB 4x4 Accessories, Australian based four-wheel parts manufacturer, is proud to announce another great product for the newly released Jeep Wrangler JK. ARB is world renowned for engineering and manufacturing near indestructible body protection equipment for a wide variety of vehicles around the world, and the new ARB JK Wrangler Rock Sliders are no exception.

Made from .25" thick 2.4" OD Australian 250 Grade mild steel tubing, the internal mandrel bent Rock Sliders are designed to be a simple bolt on protection solution for the JK's body. The ARB Rock Sliders attach entirely to factory-drilled holes in the chassis and rear lower control arm hangers. Connecting directly to the vehicle's chassis provides the strongest mount possible and by utilizing the rear lower control arm hanger as a mounting location, the Rock Sliders will also strengthen both the chassis and rear suspension system for improved off-road use.

As with most ARB body protection accessories, the JK Rock Sliders are coated to prevent rock-spray damage with a high quality satin black powder coat finish that stylishly matches the satin-coated front and rear ARB JK bumpers. For custom paint matching simply gently scuff the bar to prep. ARB's powder coat finish is designed to work as a proper base coat for painting as well as a stand-alone finish.

Sold complete with quality hardware and easy installation instructions, ARB JK Rock Sliders are currently available and can be ordered using the following ARB part numbers:

NEWS RELEASE
