ARB Speedy Seal Tire Puncture Repair Kit

Seattle, WA – ARB 4x4 Accessories, Australian based four-wheel parts manufacturer, has added the ARB Speedy Seal tire puncture repair kit to their extensive line of premium recovery gear. When driving off road, frequent changes in tire pressure and challenging terrains can result in multiple tire punctures per day, making it essential to carry the appropriate tire repair tools on the trail.

Packaged in a compact carry case, the ARB Speedy Seal tire puncture repair kit includes all of the components necessary to repair tubeless radial or cross ply tires, without removing the tire or rim.

The kit includes a quality pencil type tire gauge with dual pressure range and dual chuck, insertion and reamer tools, lubricant, additional valve accessories and 30 self vulcanizing repair cords for complete air sealing. Spare repair cords are also available in packs of 50 from ARB, so before you head out on your next four-wheel drive trip, make sure you have all of the necessary equipment for making emergency repairs.

With a high visibility, blow molded case styled to match the new ARB Off-Road Accessory bags, the ARB Speedy Seal is an ideal addition to any recovery kit.
