New Deluxe Bull Bar for Jeep Liberty

Seattle, WA – ARB 4x4 Accessories, Australian based four-wheel parts manufacturer, now offers a deluxe style bull bar for the 2005 model Jeep Liberty.

Rivaling the previous Liberty body style ARB bull bar, which won the Daimler Chrysler Design Excellence award at the 2003 SEMA show, the 2005 model offers the same style and safety while offering a full range of features to meet all of your off-road needs.

Superbly engineered in true ARB fashion, the upswept and tapered wing design of this air bag compatible bar ensures optimum strength and an improved approach angle. A steel air deflector located under the center pan facilitates air-flow through the engine compartment to make certain that your vehicle runs as well as it looks.

All of your lighting needs with this bar have been arranged for ease of installation by including recessed indicators and parking lights. Provisions for the factory fog lights allow them to be relocated in to the bull bar wings and as always, provision for additional driving lights is incorporated.

Compatible with a range of Warn winches and featuring Hi-Lift jacking points and twin CB antenna mounting positions, this new bull bar is both stylish and practical.

Whether you are heading out for a day on the trail or a commute in the city, an ARB bull bar provides the Liberty with an enormous amount of protection.

ARB bull bars are currently available for various models of: Dodge, Ford, Jeep, Honda, Hyundai, Isuzu, Kia, Land Rover, Mazda, Mitsubishi, Nissan, Suzuki and Toyota. Chevrolet full-sized truck bars are anticipated for release in early 2006.
