

**4X4 ACCESSORIES**

**DATE:**

January 2015

**PRODUCT AWARD:**

Overland Journal Gear 2015  
"Overland Tested: Air Compressors"  
Editors Choice Award

**APPLICATION:**

Twin Motor Portable Compressor

**PART NO. :**

CKMTP12

**PRICING:**

Retail: \$875.00

**AVAILABILITY:**

In Stock

# PRODUCT EVALUATION

Chris Collard, editor-in-chief of Overland Journal, evaluated six different portable air compressors for the 2015 Gear Issue. As he points out in the article having compressed air on demand provides the ability to reinflate tires, run pneumatic tools, and clean parts. Each of which can be a vital aspect of any four-wheel drive trip.

The evaluations tests included evaluating duty cycle, output, and heat dissipation. Each compressor was run through a gamut of tests which evaluated each compressor's ability to reset a tire bead, run pneumatic tools, inflate a tire, and maintain duty cycles.

ARB 4x4 Accessories is proud to announce that the ARB CKMTP12 Twin Motor Portable Compressor was awarded the prestigious "Editor's Choice" award by Overland Journal over all other competitors for its performance during this evaluation. To read more about the Overland Journal test, pick up the issue at your local magazine rack!
